

**STRONG PARTNERS.
TOUGH TRUCKS.™**

H40-70UT SIT-DOWN COUNTERBALANCED FORKLIFT

MEETS THE NEED MAKES THE MOVE

For our customers who approach business with a no-nonsense, uncomplicated approach, Hyster has developed the **UT series** of lift trucks, providing an ideal solution to meet your needs, without compromising performance.

The UT Series gives you affordable forklifts that deliver reliable and cost-effective materials handling solutions for applications across many industries. A broad choice of features and options help you to configure each truck to the needs of your specific application.

1 ROBUST OVERHEAD GUARD

2 FULL SUSPENSION SEAT

3 LOW STEP HEIGHT

4 WIDE VIEW MAST

5 SMALL STEERING WHEEL

6 DURABLE ENGINE

ENGINEERED FOR COMFORT

- Familiar automotive-style layout
- Full suspension seat
- 3.5" LCD display
- Ample foot room on floor plate
- Vibration-reducing dual suspension drivetrain system
- Low-effort hand parking brake lever
- Small diameter steering wheel with adjustable steering column
- Low step height provides easy access to the truck
- Wide view mast
- High strength overhead guard
- Low center of gravity
- Operator presence system

The thin, profiled steel overhead guard helps minimize blind spots, enabling safe and efficient operation.

The outside width of the wide view mast is 28.3", providing the operator with a significant front field of view. This minimizes blind spots, helping to increase operator comfort as well as productive and efficient operation.

The Hyster Display with 3.5" LCD provides convenient viewing of critical data when driving and operating.

Spacious foot room and convenient control pedals help reduce operator fatigue and increase operator comfort.

The small, 11.8" diameter steering wheel is easy to manipulate and very responsive. The adjustable steer column affords 8 degrees of adjustment to suit a variety of operators

LOW COST OF OWNERSHIP

Due to the simplicity of the components and specifications, servicing can be carried out quickly and easily. The engine cover, instrument panel, display and most other components are exchangeable with other capacities in the same range. Front fenders are adaptable to single or dual wheel configuration

- Large access area for service and repairs
- Simple components
- Computer-based diagnostics not required
- Triplex plate overhead guard

DURABLE COMPONENTS

The use of high quality, robust components, efficient filtration and excellent cooling helps contribute to reliable operations and minimizes wear and tear. This, together with the fast availability of cost-effective replacement parts, helps to reduce service and maintenance requirements and costs.

ENVIRONMENTAL PROTECTION

- Noise isolation material
- Meets EPA emissions regulation requirements

The triplex plate overhead guard is developed using three pieces: left side, right side and top canopy making replacement, when appropriate and authorized, more convenient

The specialized dual-suspension system features a full floating safeguard/cabin system and an engine vibration damper to decrease vibration and noise. The Suspended transmission replaces traditional rigid connections.

Large access space to engine compartment helps make service and repairs convenient.

CERTIFICATION: Hyster lift trucks meet the design and construction requirements of B56.1-1969, per OSHA Section 1910.178(a)(2), and also comply with the B56.1 revision in effect at time of manufacture. Certification of compliance with the applicable ANSI standards appears on the lift truck. Performance specifications are for a truck equipped as described under Standard Equipment on this Technical Guide. Performance specifications are affected by the condition of the vehicle and how it is equipped, as well as by the nature, condition of the operating area, proper service and maintenance of the vehicle. If these specifications are critical, the proposed application should be discussed with your dealer.

STANDARD AND OPTIONAL EQUIPMENT

HYSTER® UT series trucks feature a comprehensive range of standard equipment, with a number of options available to suit the specific needs of your application.

STANDARD EQUIPMENT

- 1-speed powershift transaxle driveline with industrial PSI 2.4L LPG and Dual Fuel Engines
- Intuitive mechanical lever hydraulic controls
- Ergonomically-designed operator compartment
 - Easy-access operator controls
 - Small diameter steering wheel with adjustable steering column
 - Spacious foot room and convenient control pedals
 - Adjustable seat
 - Manual park brake lever
 - Low truck step height
- Operator presence system
- Hydraulic lockout feature when operator is not seated in the truck

OPTIONAL EQUIPMENT

- LPG or dual-fuel
- Pneumatic-shaped solid tires
- Various fork lengths
- Various overhead guard heights
- Integrated side-shifting carriage
- Side-shifting fork positioner carriage
- Swing-out drop down LPG bracket
- 2 front / 1 rear LED work lights
- Strobe light
- Backup alarm
- High air intake with pre-cleaner
- Tilt cylinder boots
- Various mast heights
- Full steel cab with glass panels and glass roof
- Front window with wiper

INNOVATIVE TRUCKS ENGINEERED TO MEET THE MOST DEMANDING APPLICATIONS

For over 90 years, Hyster has conquered the world's most demanding applications. In the 1920s Hyster started as a manufacturer of lifting machines used in the rigorous logging industry of the United States' Pacific Northwest. A few years later the first forklift trucks were invented and the Hyster brand quickly gained its reputation for rugged quality. Hyster® lift trucks are designed to lower your cost of operations. Every truck we make — whether powered by gasoline, LPG, diesel, electric, CNG, lithium-ion or hydrogen fuel cells — is purpose-built to excel in its application. Every truck is also backed by an unmatched network of specialists.

Dealer Network — Our Dealer Network can offer the expertise of fleet managers, parts suppliers, capital procurement specialists and trainers. Carefully chosen dealers fully understand customer applications, assist in selecting the right lift truck and provide fast, reliable support.

Hyster Fleet Services — Even if you operate other brands, we can manage your maintenance and replacement plan. We can offer complete fleet analysis, fleet history summary and a cost-effective proposal for replacement and scheduled maintenance.

Parts — With genuine Hyster® replacement parts and UNISOURCE™ parts for all makes of lift trucks, we are your one-stop source for lift truck parts. In fact, we offer more than 7 million part number crosses for most brands of materials handling and other in-plant mobile equipment.

Rental Products — When leasing or buying isn't a practical option, we have access to more than 14,000 units for short- and long-term rental. We'll help you maintain output in a cost-effective manner.

Hyster Capital — We can arrange solutions for special financing requirements, taking the difficulties out of buying the equipment you need. Whether you purchase or lease a new or used lift truck, Hyster Capital offers superior service and competitive rates.

Special Products Engineering Department (SPED) — Different materials require different handling. That's why we can work with you to customize your lift trucks. From strobe lights to specially made forks, SPED has the tools to help you get the job done right.

Operator Training — Proper education in operating lift trucks minimizes the risk of injuries due to accidents while increasing productivity. Hyster offers OSHA-compliant materials that support the training of qualified operators.

Service — Your local Hyster® dealer offers a flexible, customized and comprehensive maintenance plan based on each lift truck's operation environment. Hyster service programs offer scheduled inspections and maintenance, along with quick, responsive service dispatched to your location.
