Utility you can trust™

The UTILEV® range of affordable forklift trucks delivers reliable and cost-effective materials handling solutions for applications across many industries, particularly where users require equipment without advanced functionality.

The product range has been designed to be easy to operate and maintain, and is backed up by a standard warranty and comprehensive parts availability.

Furthermore, a network of experienced resellers is on hand to provide maintenance and support.

Easy to Maintain

Thanks to the simplicity of the components and specification, servicing can be carried out quickly and easily, even when PCs, laptops or diagnostic tools are not available.

Simple to Use

The ergonomically designed control handle minimizes wrist movement and provides a solid grip for additional control while operating the unit. Lift, lower, and horn buttons are conveniently located at the operator's fingertips. The butterfly throttle control provides multiple grip positions, minimizing operator fatigue while allowing travel direction and speed to be selected by rotating the actuator in the desired direction of travel.

A range of standard features help to ensure that the truck is configured to the needs of the application.

Affordable to Own

The use of proven, high quality and robust components result in reliable operation and lower wear and tear. This - together with the fast availability of cost-effective replacement parts - helps to reduce service and maintenance requirements and costs.
